# 16<sup>TH</sup> EUROPEAN CONFERENCE ON ANTENNAS & PROPAGATION

# EuCAP

## Madrid

27 MARCH / 1 APRIL 2022

**FOCUS on linking antennas and propagation with new terrestrial and satellite communication networks**

### Why joining us for EuCAP 2022

- **After the last EuCAP2020 and EuCAP2021 virtual events**, we are eager to meet and share. We will make this come back to a physical meeting exceptional!
- **for the high technical-scientific** conference level supported by strong regional industries and universities
- **for the venue:** Its avant-garde design has given it great versatility, with the technology and services needed for our congress.
- **for the city:** Madrid, extraordinary cultural wealth and green spaces, great facilities and accessible from Europe, America and Africa with excellent connections by air to the main cities of the world.
  - » **200 direct flight** destinations
  - » **15-20 min.** between airport, city centre and conference venue by public transport

## Dear Colleagues,

On behalf of the Conference Organizing Committee, it is my pleasure to invite you to EuCAP 2022, Europe's flagship conference on antennas and propagation, which will take place in Madrid from March 27<sup>th</sup> to April 1st.

Madrid is the capital and most populated city of Spain, with more than 3 million people, and its hotel facilities are among the best in Europe. Madrid hosts more than fifteen universities and it is a hub of entrepreneurial innovation and technology, with branches of the most important companies in the areas of aerospace industry and communications.

The host country, Spain, has a strong antennas and propagation community in both academia and industry and, Madrid, as the capital of Spain, hosts the main branches of the high-tech companies in Spain. In radiofrequency and Aero spatial sectors, Airbus, Thales Alenia, INDRA, SENER among others have their offices in Madrid metropolitan area, working more than two hundred antenna engineers in those companies. The cellular Spanish companies (Telefonica, Vodafone, Orange among others) and the telecommunications equipment vendors have also their headquarters in this area. Therefore, EuCAP 2022 will be a unique place to strengthen the link between the scientific antennas and propagation communities in areas related to 5G, space applications, or future communication systems.

Madrid is accessible from Europe, America and Africa with excellent connections by air with the main cities of the world. The cultural links with Latin America will increase the long-term relations between EuCAP and Latin America researchers in the antenna and propagation field.

“Palacio Municipal de Congresos” Convention Centre will host EuCAP 2022. This Convention has a total of 10,373 square meters of exhibition areas, distributed along the various floors of the building. There are also two auditoriums, an all-purpose hall with an area of 2,200 m<sup>2</sup>, and thirty rooms and halls with different capacities. Also, it is very well connected by metro to downtown and airport (only 10 minutes by metro).

I invite all of you to come to Madrid, to attend the technical activities of EuCAP 2022, but also to spend some days to enjoy Madrid culture, with some of the most important galleries in the world, as the Museums of Prado, “Reina Sofia” or Thyssen-Bornemisza, and, of course, Madrid day and night live.

I very much look forward to welcoming you in the amazing city of Madrid for EuCAP 2022.

Sincerely

**Manuel Sierra Castañer**  
Conference Chair

## Important dates

### Convened session proposals:

**Call:** April 20<sup>th</sup>, 2021

**Deadline:** June 20<sup>th</sup> 2021

**Notification:** July 12<sup>th</sup> 2021

### Call for papers:

**Call:** July 2<sup>nd</sup>, 2021

**Deadline:** October 15<sup>th</sup>, 2021  
(fixed deadline).  
Several reminders.

**Notification:** December 21<sup>st</sup>, 2021

## General information

### Technical Secretariat

GRUPO PACIFICO  
Eucap2022@pacifico-meetings.com

### Website:
